Award of the Fire-Stopping & Fire-Sealant works for the Hamad International Airport Expansion

Hamad International Airport has launched the expansion work for the airport by adding a 10,000m² indoor tropical garden in a new central concourse and 268m² water features along with 11,720m² retail, food and beverages area will be created as part of the expansion. The terminal's expansion will increase the annual passenger capacity of the airport from 24 million to 53 million by 2022.

MIDMAC-TAV-TAISEI JV the main contractor has awarded the fire-stopping & fire sealant works for QCTC – Qatar Construction Technique Company using STI Materials for Joints Wall and MEP conduits. QCTC's role will not stop on the supply and application of materials but also on the handing over for the Qatar Civil Defense.

Average Contract Value will exceed QAR 4 Million with a potential of additional variations.
